## We push the boundaries of today's processing technology

Thank you for allowing us to present to you the most prestigious, efficient and productive plate processor ever made, the **NewsSpeed**.

As the global market leader in our niche, Glunz & Jensen keeps pushing the boundaries of processing technology, all in an effort to enhance value output and ease of operation for our customers. The cornerstones in the **NewsSpeed** are exactly that: High processing speed, No water waste, Clean plates and 24/7 reliability. Everything that is required in time sensitive newspaper companies like yours is included in the **NewsSpeed**.

### A zero tolerance environment support

We have been in the lead of this business for more than 40 years and devoted to advanced prepress solutions from the onset. We know what it takes to work in a zero tolerance environment with minimum staff and tight deadlines. We know that our customers rely on no-down time product solutions, and we strive to provide exactly that, through our global partnerships with all the most prestigious multinational corporations in our industry.

### NewsSpeed is developed for Newspapers

We have developed the **NewsSpeed** specifically for Newspaper printers and we welcome you to witness us and the **NewsSpeed** first hand.

We hope to hear from you - either directly or via our many partners in Europe. Feel free to contact me if you have any questions at [pga@glunz-jensen.com](mailto:pga@glunz-jensen.com) or call +45 5768 8326.

### Kind regards

Per Gede Arild
