

iCTP Consumables & Accessories

CREATE.
INTEGRATE.
OPTIMISE.

Keep creating high quality inkjet CtP plates

At Glunz & Jensen, we work tirelessly to continually optimise our iCTP™ consumables and accessories, allowing you to create the most resilient plates and print the most detailed images possible with inkjet CtP technology. Several of our expert iCTP team are educated printers, so they know what it takes to make great products which work in the field.

To help you find what you need, we group consumables and accessories for iCTP products into these categories:

Consumables

- iPlates™
- Liquid Dot™
- Maintenance Fluid
- i-Finisher
- iPlate Cleaner

▲ iCTP consumables are designed to work together to create the sharpest and most resilient image possible.

RIP Plug-ins

- ColorPro
- TrapPro
- Harlequin RIP software

▲ A dedicated RIP solution to help you achieve the best professional quality for your printed products.

Accessories

- Maintenance Kits
- RIP Stand
- Deletion Pens
- Illuminated Magnifier
- Maintenance Tank
- Cleaning Sticks

▲ All the necessary components to carry out regular maintenance on your iCTP system are included in Maintenance Kits.

Service

- Periodic Service Kits
- Spare Parts
- Cleaning Fluid

▲ Periodic service ensures stable production and maximum up-time by replacing worn parts and cleaning the imaging unit.

iPlates™
iPlates are conventionally grained aluminum plates with no thermal or light sensitive coatings and can be imaged in normal daylight conditions. They are specially designed by Glunz & Jensen and are unique to iCtP PlateWriters™.

They are available in both standard and custom sizes and in gauges from 0.15 - 0.30 mm (0.006-0.012").

Liquid Dot™

A patented, specially formulated liquid oleophilic coating, which is applied directly onto the iPlate, creating a high definition image.

Maintenance Fluid

Use maintenance fluid in non-imaging channels to keep the Liquid Dot channels clean and maintain excellent image quality.

Illuminated Magnifier

With 10x magnification and a built-in LED light, it enables you to ensure the quality of your imaged plates before you send them to press.

Deletion Pens

Allow you to make small corrections and remove minor flaws on your imaged plates, saving time and resources.

iPlate Cleaner

A mild and fast acting cleaner for iPlates that powers through dried ink and gum without damage to the image.

i-Finisher

Desensitises and protects the background of your plates. Apply with the finishing unit or manually to protect plates between printing jobs.

RIP Stand

Create a convenient and ergonomic workstation by mounting your RIP computer, monitor and keyboard directly onto the table of your PlateWriter.

Periodic Service Kits

With the correct service and maintenance, your iCtP PlateWriter system will continue to deliver the high quality and productivity you expect for many years to come between printing jobs.

To make this process as simple as possible, we have developed dedicated Periodic Service Kits.

Frequency of Periodic Service

Average plate usage per day	Average plate usage per month	Annual plate usage (m ²)	Annual plate usage (ft ²)	Service period (months)
2-UP/B3 PLATES				
20	up to 500	1500	16000	12
40	500-1000	1500-3000	16000-32000	9
over 40	over 1000	over 3000	over 32000	6
4-UP/B2 PLATES				
10	up to 300	2000	21500	12
20	300-500	2000-3500	21500-37500	9
over 20	over 500	over 3500	37500	6
